APPLE MONITOR //c TECHNICAL PROCEDURES

Section 1

Serial Number Transfer

Contents:

Serial Number Transfer.....	1.1
-----------------------------	-----

## Serial Number Transfer

WHEN A CUSTOMER BRINGS IN A DEFECTIVE MONITOR //c, HERE'S WHAT YOU DO TO REPLACE IT:

1. Record the serial number from the back of the customer's defective Monitor //c.
2. Take a new Monitor //c from your service stock. You will find a transparent label pasted over the original label on the back of the service stock monitor.
3. Use a medium point permanent marker to write in the customer's original serial number at the upper right hand corner of the transparent label. (See Example below.)

### EXAMPLE:

Record customer's original serial no. here.

**apple** service ser. #. \_\_\_\_\_

For Apple Use Only ►

p/n 074-0079-A

**NOTE:** For the customer's records, the repair order paperwork should note the serial number exchange.

4. Give the customer the monitor from your service stock, and send the customer's defective monitor to Apple.

**NOTE:** The customer's power and video cables are not returned to Apple as part of the module exchange. Leave the cables with the customer.
